

Fixed or portable, this massive stand enables a stable location for sockets and chargers. Ideal for lobbies, waiting rooms, and receptions, or where power cables come from the floor. Fixed is used in spaces with double floors, providing a direct inlet for cables from the floor. When used in this

way, in addition to power sockets, it can be further equipped with data modules. The portable version, with a large stand ensuring a stable upright position, is used to provide power sockets and fast chargers, with or without switches for each group of sockets, but without data modules.

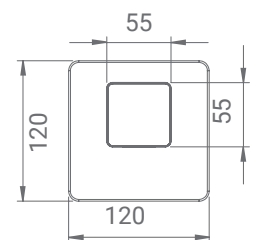

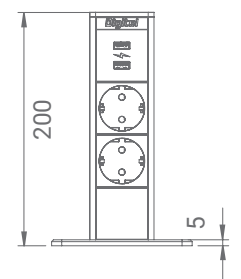

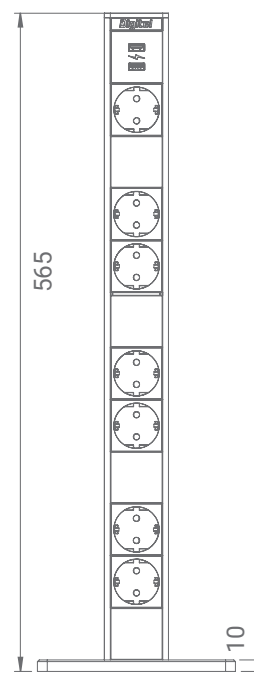

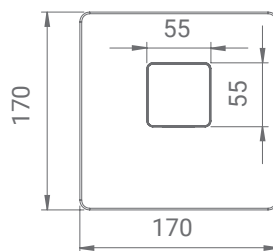

**ADVANTAGES**

- Flexible use
- Very stable
- Ideal when power comes from the floor

**POWER CHARACTERISTICS**

- **Voltage:** 100-250 V max
- **Current:** 16 A max
- **Frequency:** 50-60 Hz
- **Temperature:** 0 – 40°C
- **Relative humidity:** 0 – 95 % (no condensing)
- **Protection:** IP 20
- **Power cable / connector:** cable HO5VV - F, 3x1,5mm<sup>2</sup> EPN 1104/EPN 1114 (Wieland m/f) – 400mm. For additional cables, (Table 5, page 56)
